HOMORONS, MAY, 28D, 1804.

PETITION to the House of Commons is now being circulated praying for an amended constitution for this Colony, What is asked Per don Case for is that there shall be a majority of unofficial members in the Legislative Council that these members shall be elected by the ratepayors, and that the official members be accorded freedom of debate and vote The petition will no doubt be largely signed. for there is a general feeling that the Colony ought to have more control over its own not command the manimous approval of those who have been consulted in the matter. It remains to be seen what view the public will take of it, but we think it may movement. Differences of opinion may exist as to detail, but the petition need not necessarily be regarded as

and unalterable statement of the Colony's desires. For our own part, we have 12.96 13.92 for many years past advocated the establishment of a Municipal Council and we still think that is what the Colony really re-Chateau Hant Brion Larrivet 18.60 19.20 | quires. A Municipal Council would have effective and absolute control over its own officers and within municipal limits we would become a really self-governing community; A majority of unofficials in the Legislativ Council means a good doal less than this, for that body has no power either to appoint or dismiss officials or, in any way to interfere with them in the details of their work. It is true the Legislative Council, as proposed to be reconstructed, would have a qualified power of refusing supplies, but that is an extreme remedy only to be applied in extrema cases, and in the past history of the Colony it would be difficult to point to any crisis at which the power would have been exercised had it baen in existence. The Government has made mistakes, and plenty of them, but there has never been any suspicion of its bonesty as a Government, even when the Governor as an individual has not been absolutely "straight;" and when public opinion has been really excited over any before Mr. Consul Book and two Associates question and has unmistakeably expressed itself it has always been histened to, even to the extent of securing the removal of a Governor, as in the case of the late Sir JOHN POPE HENNESSY: Speaking broadly it 600 shares registered in the name of the demay be said that the Colouy has been well served by its Government, but the eystem is too cumbrous for the proper management interest at the rate of five por cent. of the everyday affairs of the community The mere alteration of the constitutionof the Logislative Council will not greatly

that body be constituted, must necessarily be circumscribed, for Hongkoug: being a did not know that he had ever seen the lady fortress, and its political importance equalling if not exceeding its commercial importonce, the home Government must necessarily retain in its own hands the paramount than was at first reported. The Hankow corauthority. No sensible man, in view of the character of the population (mostly Chinese), of the geographical situation of the Colony, and of the well known covetonspess of China for its repossession, could suppose it would be anything less than madness to grant representative government The character that is possessed by the Australian Colonies. But there would be no madness in giving the Colony full and unrestricted control over its roads and streets. its lighting and water supply, the buoying of its barbour, and so on. But for this i is executive control that is wanted, and that Council. It is said that there are not sufficient competent men having at their disposal charge of the duties of a Municipal Councillor, if that is so the argument tells equally against the enlargement of the Legislative there, being little sale for Irish Whisky in the Council or any increase in the amount of Per dos. Casa in the public spirit of the community to

authority of the Legislative Council, bowever

its work. We have sufficient confidence material. The top floor of the adjacent house, believe that the men will be found when they are wanted. But while we think that by water. The contents of No. 116 are insured a Municipal Council would best meet the needs of the Colony, we regard an increase of the police we learn that there are several o the number of the unofficial members We only guarantes our Wines and Spirits to the Legislative Council and thoir election by some form of popular suffrage as in itself a desirable reform, though less desirable than the other. The petition for a reform of the Legislative Council will at all events bring before the notice of the House of Commons the fact that reform of some kind required. Before the prayer of the petition is granted there will as a matter of course be further inquiry, and it is very Good Leaward Island . \$2.50 per Gallon. Tossible that the home Government may favourable reply to this memorial, and have much more complete and satisfactory than the say they cannot concede exactly what is amounced that the salaries of the foreign staff, case was tried upon at the Police Court—there asked but are willing to assent to the b remine when longht direct from us on the establishment of a Municipal Council. As ment being that a portion of the salary Wr. Leach took had only just been a general request for reform of some kind will be paid at sterling rates. We need instructed and would like time to flad out whethe petition may, we think be honestly and scarcely say that the generous and liberal ther any additional evidence was forthcoming. cordially signed, sven by those who would employed has been received has given great it being understood that Mr Lonch would in prefer to see a Municipal Council established satisfaction and the action taken by the dicate his course on Friday. rather than a reconstruction of the Legisla- ship to which many men bave been put by the

view to that the matter dorsespondents are a sufficient to towards the manner sulfared in the light of the argemental

MR. MORETON PREWEN ON TRE SILVER QUESTION IN OHINA.

The last American mail brought as two letters from Washington from Mr. Moreton Frewer, ing himself with the Mac Swan Cup and optional ling of the Empire and the important and the well-known writer on the silver problem. In announces that a resolution will shortly be passed in the U.S. Senate, asking the President to negotiate with the Government of Mexico, for the permission to use the dollar die of the Mexical mint in the U.S. mints at Carson Nevada) and Sau Francisco, the Intention peing to send the silver product of the Rocky Mountains direct to San Franciand and the other Pacific ports, and from thence forward it to China and Singapore in the bandy form of Mexican dollars. This proposal. Mr. Frewen tells us, is almost certain to scoure the amotion of the Government of Mexico and he asks whether the conversion of a great deal fellyer into Mexican dollars would lead to an inorchised absorption of allver by China. The Mexican minte have been striking annually about to her five million of these pieces for export to the Far East, and although the seign lorage charge in Mexico is 4d per cent., whereas the duty on silver bullion exported is only 2 per cent., some sentwices million ounges of silver are exported from Mexico in the form of dollars as against only four million ounces in the shape of bullion this promit to indicate that probably in product might secure a footing in China and the Maley peninsula veven though shipmonts of bar are redubling and drig down the market. It seems bossible that this export of dollars bright anadise bree dimensions, if the great fall in exchange rates gives China again the control of the ten trade at the expense of ludie, and

ationistes the exports of silk. "I observe that the Canton mint last year only doined nome three million ounces of silver. two thirds of which took the shape of an issue of monless than pineteen million ten-cent pleases. Would it be well to soin small currency to San Francisco? The coinage of British India has frequently been in brocks of forty million ounces for a single year the fact that only three million ounces were coined within China seems id suggest that a great deal of coin might be poured into China, if -always if -the experts of China are greatly stimulated and her imports diminished by the recent collapse in exchange Of the twenty-five million Mexicandolisrs experted it appears that about six millions would via London and Suez East, while over sight and a half millions sailed from San Francisco, what became of the large bulance which did leave done. Shipping .- Inde-Chines have been sold. Mexico and must have reached the Kast by some

means there is nothing to show. "Is it not likely that the coingre of silver into dellars at San Francisco might be followed by a demand for these deliars in China for loans to be made by banks in the interior? This cornage might greatly relieve the position of silver of there is on the part of China a demand for Moziera dollars greater than the Mexican mints can supply, and greater, too, than the Marian mines can furnish. One would cartainy suppose that China might absurb a vast mass of coin such absorption being followed by nu expansion of trade and on or prise, with increas-

Mr. Frewen goos on to ask wustber India

screenplished at an high as I le. 160; which is a rise might not become an important quatomer for of 184 per cent. on my last wook's prices. Horse these dollars, "especially if the dollars are Bassars and Majors have found buyers at previous allowed to enter freely, while the present import duty of five por cent on imported allver bullion The proposed noinage is being collected. in San Francisco marks an interesting departure; it may stimulate the trade of the Pacific coast, and also relieve the Loudon market of a mass of silver bullion which is proving very indigestible in that shape, and is in this way dragging down archange rates. Might it not also be possible for the Government of India to fix an exchange rate between the dalar and the ranne notepling the dollar for revenue and approvings, tous zonange with Hongkong and Shanghai ? We can hardly believe that Mexico will trooly end her dies to the U.S. mints, which seems to us as probable as that a maker of first-class grey shirtings with a favourite oken should lend his shop to a sompetitor. It would be well, too. bufors the U.S. mints begin to use these dies for them to hiderstand that Maxican dellars are not the currency in thing; that there is only a limited demand for them in the Far East, and that the moment that demand is supplied they fall in price to the level of bar silver, and are melted down into syone as har allver is. The columns of a certain quantity of American silver into Mexiour dollars would be no real relief to the London silver market. Using absorbs a certain quanity of silver -only a small quantity, if the American silver that now goes to London for sale were sent direct to Chine, there would be so much less bought for China in London. The fall in exchange note very slowly, as Mr. Kopach has pointed out in stimulation exports from China, because the quantity exported of China's produce, even of sile, is only a small portion of what is produced and the prices offered by experters do not necessarily rule the market. It remains to be seen what her the low exchange will "give Chica again the control of the ten trade at the expense of Ludiu; but it is to be feared that the tess of India and Ceylon have obtained too strong a hold over the taste of

> anoisco would be that it would go, as we have seen fractional ourrency go before, to a discount of acteen or twenty per cent. There would probably, however, he so more demand for a British dollar, except as a matter of putriotism. if the U.S. mints took to coining Mexican dollars Altogether we are no opining here for practically unlimited supply of Mexican dollars, nor do we think the proposition would have been taken late gene deration at Washingfou if it had been understood there that the Mexican dollar is not the currency of China. In his second letter, dated Washington, the 23rd of March. Mr. Moreton Fremen refers again to the proposal about to be made in Congress as to minting Mexican dellars in San Francisco for the China trade; he adds that the Wilson Tariff Bill has now been reported to the Senate and comes up for discussion and amendment in ten days. Its passage will doubtless be deleved for three months or more," giving time for a serious consider ition in Ohine of the proposal on which we wrote two days ago, "The silver men," says Mr. Frames, who are in a majority in both Houses. are evidently determined to strike at England. ibrough her Solonios and India, by every means in their power. England, it is said can best be argued with after the rule of her industries And the point here is how best to stimulate China's exports at the expense of India's so that Mexican dollars minted at San Francisco may be paid for China's exports instead of paying gold in London for the exports of British India. It is almost cortain;

the English public. Mr. diorton Frowen thinks

a great deal of coin might be poured into China;

nt it wanted only be taken at about the price of

ber silver, and the result of the shipment of a

je quantity of fractional currency from san

then that Indian tea will be taxed heavily, while tea from China will be admitted free. Senators are hanting everywhere for other articles of Oriental export in which a preference in favour. of China might he established as against India." It has been suspected for some time by those who have watched the manipulation of the silver market that that market has been controlled with a view to drive England into bimetalliam die and elsewhere. With our long and and 25, in which you hand me's protest from the or the abandonment of the wingle gold et andard experience of the injurious effects of opinio con | Chamber of Commerce at Skanghal against the and now air Mereton Frewen tells, us that sumption on the Chinese people, we cannot but notice published by the Imperial Chinese Cus, this is the avowed object of the policy of the feel the gravest approbensions and to what the toms with reference to the importation of machine silver men. INNOLISH AND CHINES

An Anglo-Chinese Biotionary, published at the

675] Proprietor, THOVAS KEATING London;

Daily Pross Office, Hongkong. For comprehensiveners and practical service this Work stau is unrivalled. All the new words which the Chinese have of latey ours been and in science generally, which the rapid advance of foreign relations has imposed upon them are here given in extense. Each and avery word in fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Panti pronunciations are give the accents being corefully marked on the best principle hitherto attained. The typography Bideyound Meru, sap., str., 416, Asat. Apr. 25 displays the success of an attempt to move the Chinese and English type correspond in the size of body, thereby effecting a vast economy of O. M. S. N. Co.

space, achieving a electrical not previously Engested Mark Jan back, 147, Kawamoto, attained, and dispension with those west margins and vacant apaces which have heretofore characterised Chinese publications.

following faute are submitted for ownsideration:-Chalmers Vocabulary contains about 18.00 Chinese characters and Medburst's English and Chinese Distionary about 100,000, whilst this work conta is more than 50,000 English words, and upwa is of 600,000 Chinese characters. Again, despite all the grammers and other elementary works as yet published the student of this difficult language absolutely reportation to Yokohama an other Japan Ports, quires, examples to display the various appli cations and equivalents of different words which have one general meaning. Of these examples Verspan, British ship 1.313 Rowley, Mar. 20 this work contains more than five times as Havana, Trinidad; and Demorare, and to ports many as any other Dictionary hitherto pub-For practical purposes the arrangement of the work is so complete, that a reference to its naces enables a person who understands Eurlish

the work will be found indispensable to all Europeans residing in Chius, and to the natives themselves it explains subjects fully with which Albert, Norwegian atr., 461, Irgens, Apr. 16 very few indeed of them are perfectly acquainted. Po parties resident in England and interested in China it cannot but be invaluable occasion-
